

BonTerra
Limited

Bonterra History,

Since 1996 – A Legacy of Natural Protection

Together with Bonterra Weiland GmbH, Hayleys PLC has founded Bonterra Ltd in 1996, to manufacture Erosion Control Blankets in Sri Lanka. Since 1996, Bonterra Ltd has grown into the world's name in natural erosion control products. With decades of expertise, we manufacture and supply the highest quality erosion control blankets and solutions that safeguard soil, support sustainability and protect environments across the globe. Today, Bonterra stands as a symbol of reliability and innovation, delivering world-class erosion control products from Sri Lanka to over 75 countries.

Why Bonterra Limited?

Proven Quality – ISO 9001:2015 certified since 1996

Natural & Sustainable – Products crafted from coir, straw, and jute fibers emphasize eco-friendliness.

Rich Experience – Over three decades of industry leadership, pioneered with Hayleys and Bonterra Weiland GmbH and international recognition

Global Reach – Exported to over 75+ countries across 5 continents

End-to-End Solutions – From products to anchoring hardware, Bonterra delivers complete, turnkey erosion control systems.

Production Capability – Manufacturing capability of over 1.5 Mn sqm of Erosion Control Blankets per month backed with 3 production lines. The largest manufacturer in the region.

Coir Erosion Control Blankets with PP Nets and PP Threads

Durable coconut fiber erosion control blanket, backed with brown or black PP nets on both top and bottom sides. Built for longevity while protecting the top soil while stabilizing the slopes.

Coir Erosion Control Blankets with Jute Nets and Cotton Threads (100% Biodegradable)

Coir mat crafted with jute netting and cotton stitching. Perfect for sustainable temporary erosion control projects which required 100% biodegradable Soil covers.

R3D Mat - Wave Blanket

Resilient erosion control mat engineered for robust erosion control and slope protection for steep slopes as featured in Bonterra's R3D range.

Coir Mulch Blanket

Coir blanket backed with pp woven fabric on the bottom designed for weed suppression and increasing the water retention while enhancing the plant growth.

Straw/ Straw Coir Mixed Erosion Control Mats

Coir and Straw fibers mixed Erosion Control Mats are designed for temporary erosion control purposes and low to moderate slopes.

Jute Leno Net

Jute Mesh used to produce Erosion Control Mats and Concrete Curing purposes.

Jute Spiral Tube

Using to produce natural straw Wattles and Sand Bags.

Jute Soil Saver

Jute geotextile tailored to preserve topsoil and limit soil erosion.

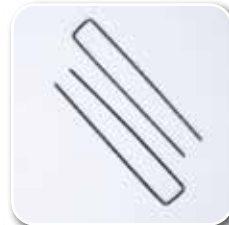

Jute Hessian Cloth

Traditional plain-weave jute fabric versatile for general soil erosion tasks and landscaping purposes.

Steel Sod Staple Pins

Robust steel staples used to anchor coir/jute mats securely essential for installation stability.

Coir Mat pieces

Customized Coir Mat pieces could be used for various purposes. Sedum Tile Production for Roof Greening and Root Ball Covers are popular applications.

Applications, Advantages and their Images

- Erosion and Sediment Control purposes
- Slope Stabilization projects
- Hydroseeding & Re-Vegetation purposes
- Road ,River and Shoreline Embankment Protection
- Sand & Dust Control Projects
- Mining Walls and Rehabilitation Projects
- Landscaping and Land Management
- Sedum Growing
- Tree Root Ball Covers
- Solar Farms
- Effective Surface to support sedum growth
- Nice backing layer which will prevent soil loss
- Works as a root stabilizer
- Enhance the vegetation
- Seeds will get an excellent bed to grow
- Easy Rolling and Less maintenance
- Perfect finish to the final product
